Jacob Isaac I. Padilla

Jacobpadilla41@gmail.com

Summary

Some interests include but not limited to: Machine Learning, Data Science, and Software Engineering. Held an Internship at the El Paso Intelligence Center learning RESTful API. Senior group project: created a web based system with React.js that utilized bootstrap and MongoDB.

Education

Graduated: Fall 2020 from the University of Texas at El Paso

Major: B.S in Computer Science with a minor in Mathematics.

Involvement

- **Internship:** Held an internship with El Paso Intelligence Center. Learning and developing RESTful API data
- **UTEP organization**: Joined an organization that would aid in shaping high school student's knowledge in the field of computer science.

Projects

- **Python:** Created a search rank based on user query including the use of web crawling to get information.
- **React.js:** Group Project to create a web-based application for the Cyber Experimentation & Analysis Division (CEAD) in El Paso, Texas.
